Authors: 

Each author must read and electronically sign the statements below before manuscripts will be considered for publication in The Journal of Urology®. Manuscripts submitted without all signatures on all statements or with illegible signatures will not be published. This fillable form is available online at www.editorialmanager.com/ju/. One author should be designated as the correspondent, and the complete address, telephone number, facsimile number and e-mail address provided.

According to the International Committee of Medical Journal Editors (ICMJE) authorship is based on the following 4 criteria:

- Substantial contributions to the conception or design of the work, or the acquisition, analysis or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

All those designated as authors must meet ALL 4 criteria for authorship and must sign the Author Submission Requirement Form. Those who do meet ALL 4 criteria will be identified as authors and their names will be printed in the byline of the article.

When a large, multicenter group or committee has conducted the work, the group should identify as authors only those individuals who fulfill ALL of the above requirements and accept direct responsibility for the manuscript. The corresponding author must clearly indicate the preferred citation and identify all individual authors as well as the group name.

Contributors to the study who do not meet ALL 4 criteria of authorship will be acknowledged in an Appendix and identified as Collaborators so their names can be indexed in MEDLINE. Examples of contributions that do not justify authorship are acquisition of funding, general supervision of a research group, served as scientific advisors, critically reviewed the study proposal, collected data, provided and cared for study patients, and participated in writing or technical editing of the manuscript. Contributors do not have to sign the Author Submission Requirement Form.
